

# What is your risk of prostate cancer?

Are you a man:

- 50 to 70 years old
- in your 40s and your father or brother has had prostate cancer
- having trouble peeing?

Talk to your doctor, nurse or health professional.

Stay well for your family and whānau

For more information pick up a leaflet from your GP team or go to [www.healthed.govt.nz](http://www.healthed.govt.nz)
